

Kiss Me By Wireless
(the original radio song)
By Ring-Hager and Louis Breau

There's a wireless station down in my heart,
And it calls in my dreams all night long;
It is operating just for you and me,
And it's spanning the hills and the sea.
Your message I love the best,
The call to happiness.

Chorus

Send each caress to me by wireless,
Its tenderness you can to me express;
I love to call you dear,
Across the atmosphere.
I hear your voice,
It thrills me through and through.
My lonely heart sighs for you, just for you!
Oh, radio-phone the answer "Yes!"
Kiss me by wireless.

There's a pulsating current,
Runs 'round my heart,
It's attuned with your own sweetheart mine;
Though you're far away,
We're never apart
For the radio station's my heart.
So on the air impress,
Our new found happiness.

(repeat chorus)
